MY LITTLE LABORER.

A thy man, with fingers oft and tender,
As any lady's fair;
Sweet open of bine, a form both frail and elender
and curis of sunny hair,
A bousehold toy, a fragile thing of beauty—
Yet with each rising sun
Begins his round of toil—a solemn duty,
That must be daily done.

To-day be building castle, house and tower,
With wendrous art and skill;
Or labors, this is hammer by the hour,
With strong, determined will.
Anon, with loaded little cart, he's plying
Some book's dark lors to read.

Now lister like some little beast of bursen, the drags himself along, and so his lordly little, voice is heard in Bolaterous shout and song.

Another hour is spent in busy toiling with hoop and top and ball—and with a patience that is never falling, the tries and conquerall.

He tries and conquers al.

But along at last o'ertakes my little rover,
Linder and the mobile breast,
Joys thrown asde; the day's hard labor over,
He sinks to quiet rest;
And as I fold him ind my bosom, aleeping,
I think, mid spathering tears,
Of what the distant future may be keeping
As work for manhood a years.

Must he distant water any or keeping As work for manhood syears.

Atmospheric Diseases.

The sir, without which no creature could live, is the source of diseases of which millions die. At this season, espewhich millions die. At this season, especially, the atmosphere is full of the germs of many kinds of sickness. Every globule of the mist and fog which cloud the earth and sky in spring holds, in solution its portion of missmatic poison.

The evil effects of this agrial virus can only be certainly averted by increasing the vital activity of the system and secur-

The wool trade is greatly excited; two or three manufacturers and a few eastern dealers, have swept the market of all the fine domestic and foreign wools available, and lote to malaris, is in the spring months.

Thus we all see only what we bring with us eyes to see. To be the jaundiced eye, the "whole universe is sickly yellow; and, naturally enough, the effect of such a vision is not exhilarating. But let a bottle of Dr. Gottlieb Fisch's Bitters be administered—and, lo, what a 3 change! The blood, upon which brain, an erve, everything depends for its wellbeing, is no longer vitiated with worn-out dead matter which the excretories are impotent to throw off! The whole external world becomes radiant with loveliness; and within, all is peace!
